CALUMO Academy: *The benefit of experience*

CALUMO Essentials

Course Description:

This course is designed for Business Professionals who want to challenge their data to produce professional, comprehensive reports that provide management with unparalleled insight into their business.

This CALUMO 12 Introductory Essentials course guides students from absolute beginner through to intermediate level. This course includes best practice examples and workshops that focus on helping students develop the analysis, reporting and planning techniques that transform simple Excel spreadsheets into interactive BI applications.

This course would benefit anyone who wants to harness the power of the CALUMO application from viewing cubes to developing reports that communicate and drive action.

Who will benefit from this course?
Beginning to intermediate level CALUMO users.

Prerequisites
Working knowledge of Excel and browsers helpful.

Duration: 1 full day
